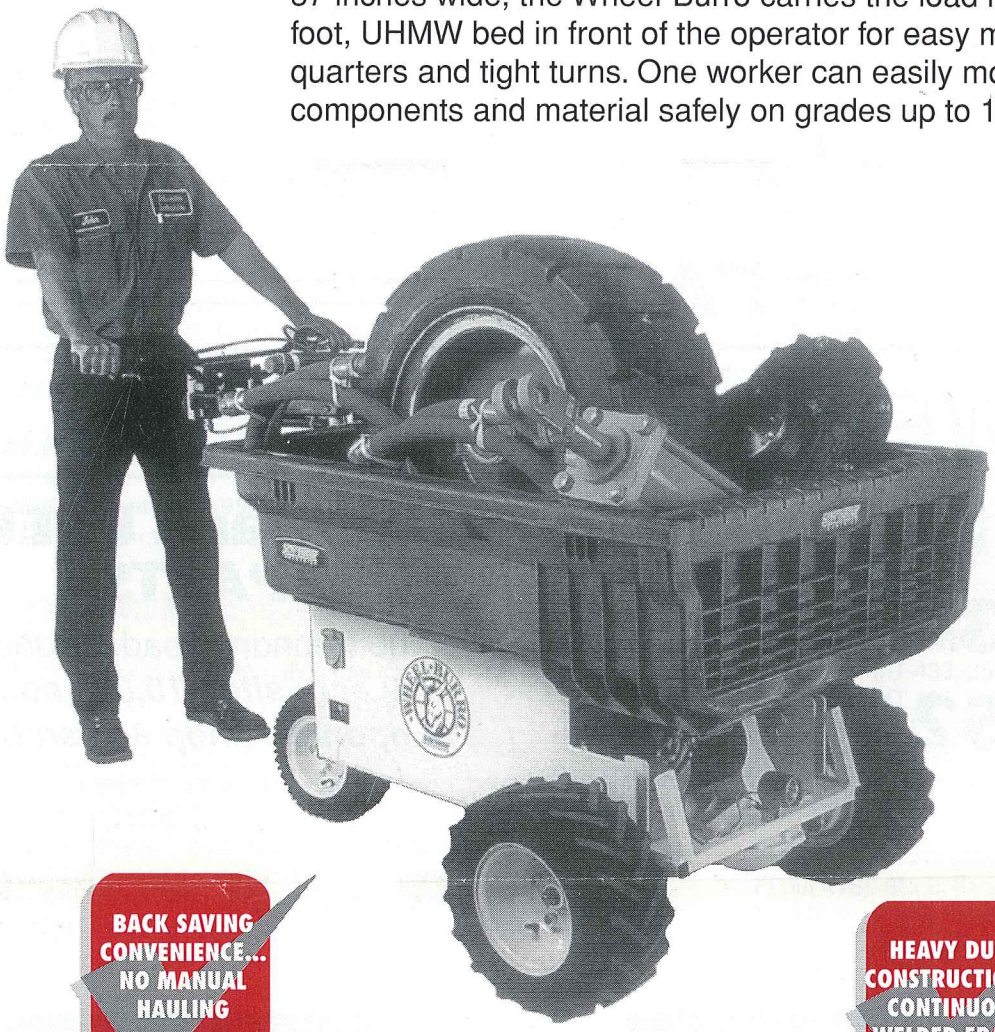
The Wheel-Burro®
from Schroeder Industries

Gives You The Power To Move Heavy Loads Quickly and Safely

The Wheel-Burro from Schroeder Industries is the safe, efficient way for one worker to move loads as heavy as 1,000 lbs. quickly and easily. Only 37 inches wide, the Wheel-Burro carries the load in a strong, 10 cubic foot, UHMW bed in front of the operator for easy movement in close quarters and tight turns. One worker can easily move a full load of tools, components and material safely on grades up to 10 percent.



SAFE... LOAD ALWAYS IN FRONT OF OPERATOR

TIME SAVINGS... CARRY MORE IN LESS TRIPS

BACK SAVING CONVENIENCE... NO MANUAL HAULING

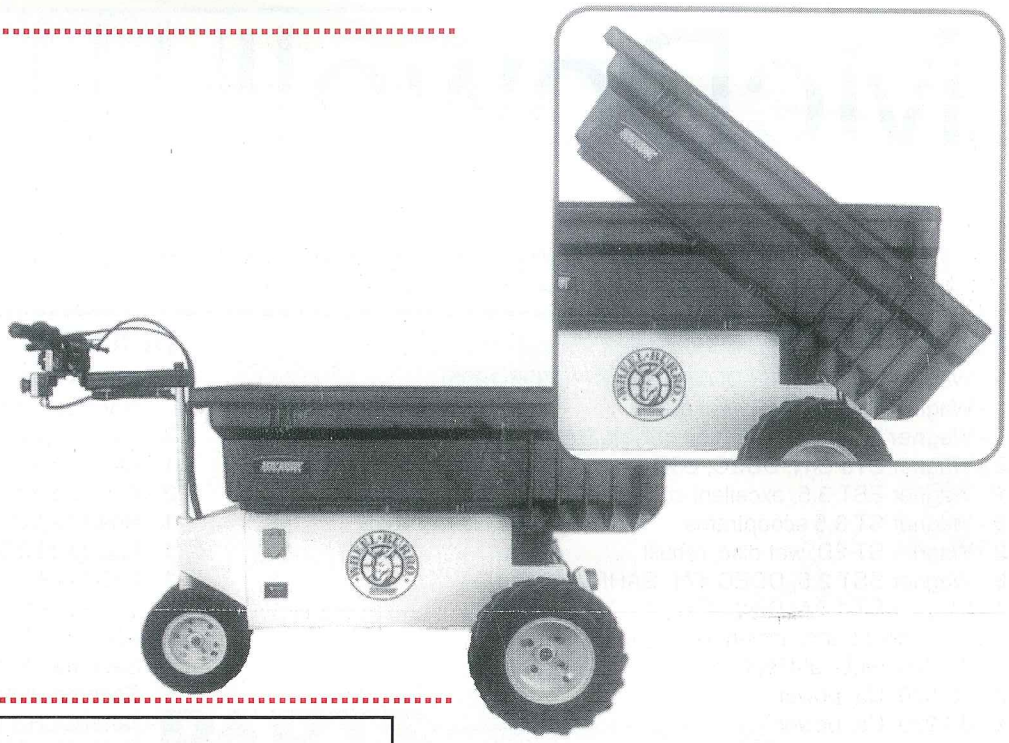
HEAVY DUTY CONSTRUCTION... CONTINUOUS WELDED FRAME

Standard Features

- Direct drive – no chains, sprockets or belts
- DC series wound traction motor
- Variable speed to 4 MPH
- Solid state controller
- Limited slip differential provides power to both driving wheels for safe positive traction on rought terrain
- Quiet 24 volt battery power
- 110 VAC on-board charger
- Capacity to carry up to 1,000 lbs or 10 cu ft of component equipment or material
- Only 37" wide to fit in close quarters and tight areas (turns within its own dimension)
- Belly switch – propels Wheel-Burro away from operator and de-energizes accelerator
- Removable tailgate and dumping bed
- 16" diameter tires

Optional Features.....

- BDI
- Operating light
- Fire extinguisher
- 24" diameter tires
- Extension cord outlet
- Optional bed construction



Specifications.....

General Information	
Capacity	Up to 1,000 lbs (10.0 cu ft)
Speed	Up to 4 mph (adjustable)
Overall Dimensions	72" (l) x 37" (w) x 35.5" (h)
Motor	1.2 HP 24 VDC 2100 rpm, 3 ft lbs torque fully enclosed
Drive axle	Rigid helical axle assembly Ratio 12.55:1 limited slip
Tires & Wheels	
Drive axle	Two 16" Ø x 6.50-8 TRU Power tires 4 hole, 4" bolt circle
Steer axle	Two 12.5" Ø tires 4 hole, 2.75" bolt circle
Solid State Control	DC traction motor controller with built-in microprocessor and high frequency power electronics and linear accelerator Belly Switch 3 position (direction) selector switch Power on/off switch
Accelerator	Hand Operated
Brakes	Electric
Battery	Two 12 Volt Deep cycle 225 min. at 25 Amps
Battery Charger	110 VAC / 24 VDC

Specifications are subject to change.
